

Exporting to PDF for InDesign

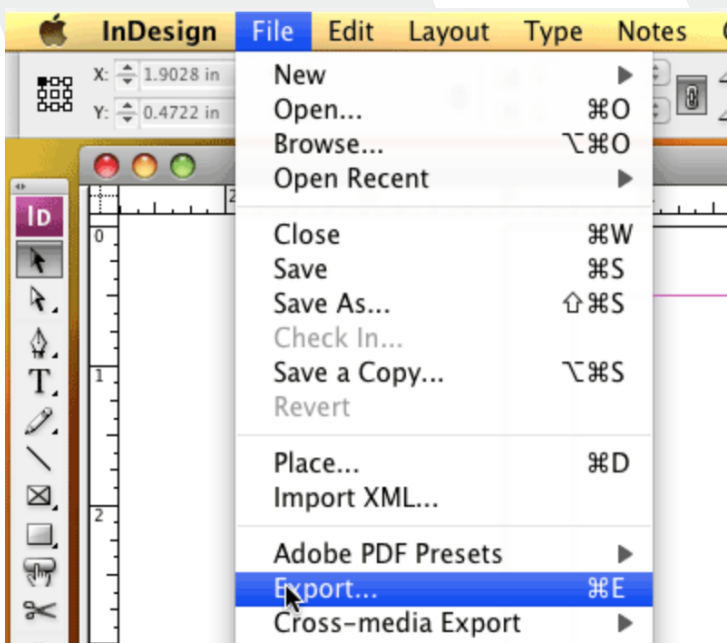

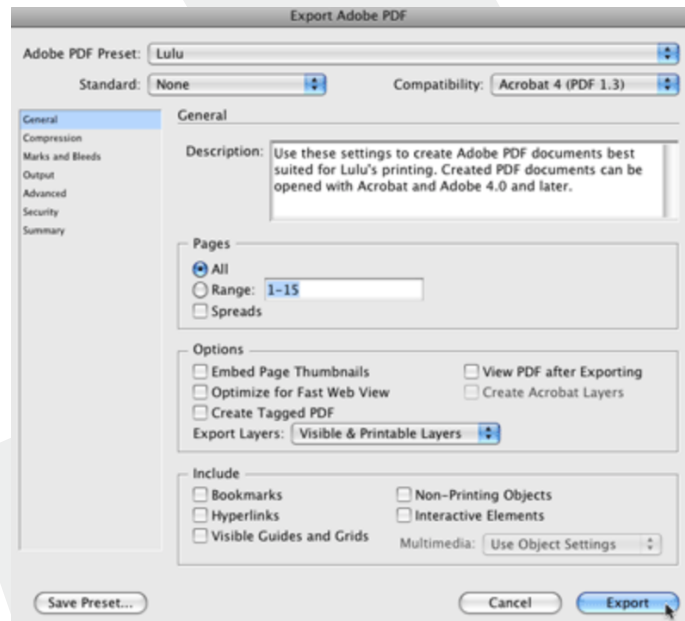

If you want to convert your InDesign file into a PDF file format, you can use Adobe InDesign, which you can download a trial version on the Internet.

Step 1. Open InDesign File

Launch your application and browse for your InDesign file in the location where you have previously saved it. Click on it and open the file in Adobe InDesign.

Step 2. Export InDesign to PDF

Click on the "File" tab and then click "Export". Now select "Adobe PDF" at the "Format" option and locate the folder where you want to place the PDF file. Click "Save" when you're ready.

Step 3. Customize PDF Properties

An export PDF window will open and here you can choose the options that fit you best. After everything is done, click "Export" the start the conversion. In a few seconds, your InDesign file will be converted in PDF. If you files have bleed remember to click and include crop marks and bleed. Click and save to your desktop.
